

## **NEW PRODUCT RELEASE**

### ***MAXI/GUARD*<sup>®</sup> ORAL CLEANSING WIPES**

Addison Biological Laboratory, Inc is proud to announce the release of their next exclusive home care dental product, *MAXI/GUARD* Oral Cleansing Wipes. *MAXI/GUARD* Oral Wipes are both an effective pet oral care product and applicator all in one. Cleansing the oral cavity of pets is much faster and easier since the wipes are already infused with our unique zinc formulation. This taste free compound neutralizes offensive mouth odors, helps reduce the deposition of plaque and aids in gingival inflammation. The wipes are textured to assist in the mechanical removal of plaque, but not so rough to cause damage to the gum tissue. *MAXI/GUARD* Oral Wipes increase owner compliance and pet acceptance.
